Batting section

- Select valid selection from the batting drop down list. E.g. if a team batted second user MUST select 'Second'. See above screenshot as an example.
- If a user select **run out** from the **HOW OUT** drop down list then user shouldn't select **By Bowler** from the drop down List. *(Reason because MOT points and Fantasy Points for Wickets are calculated from batting sheet not from bowling wicket column.*
- User must select a valid player name from the Bowler dropdown list, because MOT points and Fantasy Points are calculated based on whatever the user select from Bowler drop down list.

Batting section

- User must always enter **DNB** for the Batsman *otherwise system will not be able to calculate total*
- correct number of matches being played by that specific player.*
- In order to have valid **Batting Stats**, user must enter correct number of balls and runs.
- Always ignore DNP, if a batsman didn't bat always select **DNB NOT DNP**
- If a Batsman is **NOT OUT** or **retired Hurt**, User must select Retired hurt or **NOT OUT**, otherwise
- system will automatically count that inning which will affect overall batting average of a Player.
